

Indicative CGI of Whitings Road Project

SITE UPDATE August 2026

We are pleased to share our newsletter, providing an update on the progress on site to provide 35 residential units (twenty-nine houses and six flats) with associated car parking, cycle storage, refuse/recycling storage, amenity space and landscaping.

As you may have noticed, we are pleased to confirm that all excess earth/soil has now been removed from the site. As a result, residents should see a significant reduction in the number of large lorries arriving at and departing from the development daily. We would like to take this opportunity to thank residents for their patience and understanding during these essential early-stage groundworks. These activities were necessary to ensure that the piling works could be completed safely and efficiently during the school summer holidays, helping to minimise disruption to the local community.

LOOKING AHEAD

We will complete the installation of the site hoarding and undertake the necessary works to the existing school car park. During this period, our permanent site offices and welfare facilities will also be delivered and installed on site.

Once the piling works have been completed, we will commence the foundation works.

These works will help ensure the development continues to progress as planned while maintaining a safe working environment for both the site team and the local community.

Piling Rig on site

ABOUT BUGLER DEVELOPMENTS

Bugler Developments has been building high quality homes since 1982. We are a family-owned, award-winning contractor, working on behalf of local authorities and housing associations across London and the Southeast of England.

With our understanding and wealth of experience, we offer an integrated approach to the delivery of residential and mixed-use developments.

Giving back is also a key facet of what we do, and through the Bugler Foundation we have supported many worthwhile causes - from mental health to grassroots sport and local initiatives.

Social Value has always been important. We recognise that there is a duty to us as housebuilders to provide a positive legacy to the communities in which we work, both while we are on the site and after, and this is something our whole team buys into.
